

Docket No. AB-124U2

Amendments to the Specification

Please replace paragraph [0051], with the following amended paragraph:

[0051] The treatment may additionally or alternatively comprise electrical stimulation provided by an SCU that is or includes an implantable signal generator connected to an electrode(s) for electrically stimulating a treatment site. The signal generator may be coupled to a lead with electrode(s) positioned at the treatment site, such as shown in FIG. 4A, or may be a small implantable device, such as a BION[®] microstimulator or the like, implanted at or near the treatment site. The following documents describe various details associated with the manufacture, operation, and use of BION implantable microstimulators, and are all incorporated herein by reference:
